

## Colocation Services

**Forward-thinking businesses are realizing they can keep expenses in check while strengthening security by using a shared data center infrastructure.**

### Trust Bleuwire™ to House Your Equipment

Rather than building and maintaining your own data center to housing servers, storage and networking equipment, consider placing them in the Bleuwire™ Colocation Data Center. You'll get a reliable, secure environment for critical business systems, with maximum uptime and reduced operational exposure. At the same time, you'll keep a lid on expenses by sharing the costs of space, power and connectivity with other firms.

#### Benefits

#### Best-in-Class Physical Security

Businesses are mindful of the need to protect information from intruders, starting with limiting access to the equipment itself. The Bleuwire™ Colocation Data Center requires visitors to use a proximity card and PIN to enter the building. Then, before going into the data center, they must use another proximity card and undergo a biometric scan. The server racks are locked and the data center is monitored 24/7/365 using video surveillance and motion detectors.

- ✓ Accredited Managed Services Provider
- ✓ State-of-the-art Operations Center with Cutting Edge Technology
- ✓ 24x7x365 Remote Help Desk and On-site Support
- ✓ 24x7x365 Real-Time Network Monitoring
- ✓ Experienced, Certified Technicians and Engineers
- ✓ Dedicated Account Managers
- ✓ Predictable Monthly Cost, Scalable Level of Service
- ✓ Remote Resolution of Issues more than 90% of the Time
- ✓ Easy to Understand Graphical Reporting of Performance

## Best-in-Class Fire Suppression

The third threat is one sometimes overlooked: fire. We have extensive systems throughout the Bleuwire™ Colocation Data Center to respond quickly to any hint of a problem, with both manual and automated response mechanisms. In addition, the facility is equipped with smoke and heat detection sensors, fire doors and handheld, gas-based fire extinguishers.

## About Bleuwire™

At Bleuwire™, we don't think you should have to pay for services you don't need. That's why we offer a boutique approach to IT management so that you can select only the services that will benefit your company. The choice is yours.
