

Solutions for Construction & Real Estate Firms

You Manage the Masonry. We'll Take on the Tech.

Keeping your IT - hardware, software, phone and networks - running securely, without downtime and at peak performance is a full time job. When you maintain an expensive internal IT staff, they're most often stretched across every discipline - Jacks of all trades, but masters of none. When you try and handle it on your own, too often you get the benefit of professional IT expertise only when there's a fire to be fought.

Bleuwire™ helps construction and real estate firms slash the cost of buying and managing technology, from strategy and planning to complete outsourced management.

► Challenges

► Collaboration

Your office is wherever your feet are. You have to be able to access all your documents: contracts to blueprints to inspection reports, and more. That means that your shared network has to be up and running all the time.

► Performance & Integration

All of your equipment and software has to run perfectly on its own, and be perfectly integrated with each other. From project management systems to CAD/CAM, and from your back office to your Client portal.

- ✓ Accredited Managed Services Provider

Security

Data loss - whether by hacker, lost equipment or natural disaster - can throw a project into a tailspin, imposing days and days of delay. And every delay means money wasted and revenue missed. That demands a strategic backup and restore as well as a disaster recovery system at the ready.

Compliance

Regulations change constantly, and it's imperative that all your technology be continually monitored and upgraded to ensure they meet the most current rules. That applies to how your applications store data, how your storage protects it, and how your networks transmit it.

Costs

You face three costs. First is the capital cost of owning and licensing technology. Second is the operational cost of keeping that technology running. Third are the costs delays cause when you fall out of compliance.

About Bleuwire™

At Bleuwire™, we don't think you should have to pay for services you don't need. That's why we offer a boutique approach to IT management so that you can select only the services that will benefit your company. The choice is yours.
