

# Solutions for Dental Practices

## You Manage the Patients. We'll Take on the Tech.

Whether you're running a small dental clinic or a network of dental practices, you're reliant on technology - it helps manage your business, provides access to research, improves collaboration, streamlines communication with your patients and much more. Keeping that technology up and running is a multifaceted challenge that doesn't go away.

As a dentist, you don't always have the time or resources to keep your IT systems operating at peak performance every minute of every day. Bleuwire™ helps dental practices leverage the cost of buying and managing technology, from IT strategy and planning to outsourced infrastructure management.

### ► Challenges

#### ► Patient Satisfaction

Today, your patients expect to interact with you anywhere, anytime. Increasingly, they don't want to call you to check information or make appointments - instead, they prefer to do all of that online.

#### ► Performance & Integration

All your equipment and software needs to run smoothly - and be perfectly integrated with each other. That means everything from practice management applications and imaging systems to phone systems and cloud solutions must work in harmony.

- ✓ Affordable Lease Options Available

## ▶ Security

Nowhere does a data breach or data loss – whether by hacker or natural disaster – have as dire a consequence as it does in medical or dental practices. It's vital that you have a tested, fail - proof backup and disaster recovery strategy in place.

## ▶ Compliance

Regulations constantly change, and it's imperative that your technology is continually monitored and upgraded to ensure it meets the most current rules. That applies to how your applications store data, how your storage protects it and how your networks transmit it.

## ▶ Costs

You face three costs. First is the capital cost of owning and licensing technology. Second is the operational cost of keeping that technology running. Third are the costs you incur when you fall out of compliance.

## ▶ About Bleuwire™

At Bleuwire™, we don't think you should have to pay for services you don't need. That's why we offer a boutique approach to IT management; so that you can select only the services that will benefit your company. The choice is yours.
