Solutions for
Government Organizations

You Preside over Policy.
We'll Take on the Tech.

A steady influx of new laws, regulations and policies means IT requirements are constantly changing. Offices at both the state and city levels are in need of technology that not only holds up now, but provides continuous support as the economic landscape evolves. Government IT workers demand solutions that are flexible enough to scale seamlessly without having to make costly ongoing investments, implement entirely new systems, or mix and match individual tools from different vendors. Bleuwire™ knows how to evaluate your government agency needs and keep you on top of constituent demands.

▶ Challenges

Government organizations face the challenges of exponentially growing demands on resources with limited budgets, increasingly demanding compliance requirements, and significant consequences for non-compliance. Bleuwire™ provides tailor-made managed IT service and cloud solutions to produce flexible, compliant and secure outcomes that meet your policy, compliance and commercial challenges, as well as drive you to better efficiency.

▶ Reduce Costs

Government agencies are pressured to reduce costs at all levels. Dealing with shrinking budgets and demands for newer services is forcing agencies to carefully look for areas that may be optimized or simplified.

✓ Accredited Managed Services Provider

✓ Remote Resolution of Issues more than 90% of the Time

✓ Easy to Understand Graphical Reporting of Performance

✓ Reduces IT Operational Costs by up to 70%

Collaboration

Government agencies are forced to work together and find ways to collaborate and simplify operations with those having common needs. This is a sharp contrast to the past when agencies couldn't justify or weren't interested in combining computing resources with other agencies.

Agility

Government agencies are seeking to achieve new levels of agility and innovation. The constant demand for new services and deployment of new technologies is pushing them to simplify and reduce their infrastructure footprint.

Scalability

Government agency IT leaders are exposed to complex projects, but new demands are tasking IT organizations to their limit. They are looking to scale services up or down as required at the same time that they are able to meet business needs.

Improve Flexibility

Government agencies also face other challenges, such as security, transparency, privacy and regulatory compliance. They need to make use of better delivery models to improve flexibility and provide a better end-user experience.

About Bleuwire™

At Bleuwire™, we don't think you should have to pay for services you don't need. That's why we offer a boutique approach to IT management so that you can select only the services that will benefit your company. The choice is yours.
