

Solutions for Medical Practices

You Manage the Medicine. We'll Take on the Tech.

Whether you're running a single-doctor office or you're a hospital or clinic administrator, you're tethered to technology. It helps manage your practice, provides access to research, improves collaborative medicine, streamlines communication with your patients, and much more. Keeping that technology up and running 24x7 is a multifaceted challenge. Medical providers don't always have the resources to own their infrastructure and keep it operating at peak performance every minute of every day.

Bleuwire™ helps medical practices leverage the cost of buying and managing technology, from strategy and planning to full outsourced management.

► Challenges

► Patient Satisfaction

Today, your patients expect to interact with you anywhere, anytime. Increasingly, they don't want to call you to handle routine things, preferring instead to check test results, make appointments and find information online.

► Performance & Integration

All of your equipment and software has to run perfectly, and be perfectly integrated with each other. From practice management systems to your EMR, imaging systems to cardiac testing systems, and voice systems to virtual desktops.

- ✓ Trusted Managed Services Provider
- ✓ State-of-the-art Operations Center with Cutting Edge Technology
- ✓ 24x7x365 Remote Help Desk and On-site Support
- ✓ 24x7x365 Real-Time Network Monitoring

- ✓ Remote Resolution of Issues more than 90% of the Time
- ✓ Easy to Understand Graphical Reporting of Performance
- ✓ Reduces IT Operational Costs by up to 35%
- ✓ Affordable Lease Options Available

▶ Security

Nowhere does a data breach or data loss - whether by hacker or natural disaster - have as dire a consequence as it does in medicine. It's vital that you have a tested, fail-proof backup, restore and disaster recovery strategy in place.

▶ Compliance

Regulations constantly change and it's imperative that all your technology be continually monitored and upgraded to ensure they meet the most current rules. That applies to how your applications store data, how your storage protects it, and how your networks transmit it.

▶ Costs

You face three costs. First is the capital cost of owning and licensing technology. Second is the operational cost of keeping that technology running. Third are the costs you incur when you fall out of compliance.

▶ About Bleuwire™

At Bleuwire™, we don't think you should have to pay for services you don't need. That's why we offer a boutique approach to IT management so that you can select only the services that will benefit your company. The choice is yours.
