Solutions for Non-Profit Organizations

You Manage the Mission.
We'll Take on the Tech.

The Non-Profit Organization is the poster child for "do more with less." With a fundamental goal of reinvesting every dollar earned back into the NPO, it's imperative that every part of the operation is as lean and as cost-effective as possible. You have many different people to serve: the people you help, the partner organizations you work with to help them, the donors that help you pay for it, and others. You use technology to make it more efficient, more available, and more cost-effective.

All of that technology needs people to keep it running. Applications have to be installed, updated and tested to ensure they integrate with all your existing software. Hardware goes through the same process. Each desktop, server appliance or whatever it might be has to be expertly installed, maintained and repaired. Networks are in the mix: you're sending critical and sometimes privacy-protected data that has to reach its destination fast and without error or attack.

▶ Challenges

From workforce management to networked collaboration, and from reaching the people that need services to those that help pay for them, the IT profile of the NPO is a complex weave of technologies and services. Bleuwire™ provides the experienced, committed expertise to establish and maintain the right mix of hardware, software, networks and data for your NPO.

✓ Easy to Understand Graphical Reporting of Performance

✓ Reduces IT Operational Costs by up to 70%

▶ Quality Technology

Nonprofits must use technologies (including cloud, social and mobile technologies) to increase the quantity of clients served and improve the quality of services provided.

▶ Lower Costs

NPOs must take full advantage of the technologies that reduce the cost of services, and the time it takes to communicate information internally, to the people you help, and to the stakeholders who support the work it does.

▶ Communication

The delivery channels for programs and services are exploding, encompassing, today, websites, e-mail, mobile, social, and other technologies.

▶ Collaboration

Collaboration is key to managing both resources and money. Sharing files, schedules and contact information through technology streamlines the operation, reduces the workload for your staff and volunteers, and saves money.

▶ About Bleuwire™

At Bleuwire™, we don't think you should have to pay for services you don't need. That's why we offer a boutique approach to IT management so that you can select only the services that will benefit your company. The choice is yours.
